During/After the Video

• Does this study require any additional visits to the doctor?
  o No, this study does not require any additional visits to the doctor. Everything is done by email or during your existing care visits.

• How long will each survey take?
  o The initial survey will take about 15-20 minutes to complete. The subsequent monthly surveys take 5-10 minutes to complete.

• I do not have time to complete the survey in the office. What should I do?
  o No problem! After you complete the consent form, you will receive an email with a link to complete the survey.

• How long will this study continue?
  o The current study will last 4 years.

• Can I participate in this study if I’m moving?
  o Yes, as long as your children have been treated at CFAA at some point.

• Is my information confidential?
  o Yes, efforts will be made to limit the use of your personal information to people who have a need to review this information.

• Will my decision of whether or not to participate in the study affect my quality of care?
  o No, your study data will not be shared with your care providers. Your care will not be affected if you choose to join or decline to join this study.

• My child’s food allergy is not very severe and/or they have outgrown many of their past allergies. Can I still participate?
  o Yes! We welcome any and all information about each family’s unique experience with food allergies.
During the Consent Form/Intake Survey

- If I have questions about the consent or the study, what should I do?
  - You can email a study coordinator at FARC@Northwestern.edu before consenting to participate in the study if you have any questions about the consent or the study and we will try to get back to you as soon as possible. If you don’t finish the consent in the office, you can start again by visiting http://FoodAllergy.Northwestern.edu.

- Is “Caregiver Participant's First Name” my name or my child’s name?
  - Your name (the caregiver).

- If my child is allergic to more than one type of tree nut, does that count as one or multiple food allergens when counting the number of foods to which my child is currently allergic (question 6) or has outgrown (question 9)?
  - Multiple tree nut allergies count as one, and later in the survey you can specify the tree nuts to which your child is allergic or has outgrown.

- I cannot finish the entire survey in the office, but plan to start it here. What can I do if I need to pause halfway through?
  - Please see the directions page and refer to the “If you plan to complete the survey at home” section. At any point during the survey you can click “Save and Return Later” if you cannot complete it in one sitting. Just make sure to take a picture, text, or write down the code that shows up and follow the directions to return to the survey.

- How will I receive my gift card?
  - This will be emailed to you after consent is completed, or given to you in person.

Have more questions that were not answered here?
Please email us at FARC@northwestern.edu.

Thank you for your participation!
